

BUG REPORT

ID	BUG002		
Description	Required validation error in all fields of the form		
Severity	Minor		
Impacted scenarios	S02 - Validate the form field "What is your name?" S03 - Validate the form field "What is the date of your birth?" S04 - Validate the form field "Why did you join the testing area?"		
Current behavior	<p>Even with the required field is filled, the form is displaying the error message "This field is required."</p> <div><p>What is your name? *</p><div>weqw</div><p>This field is required.</p></div>		
Expected behavior	When the field is correctly filled out, the form should not display an error message.		
Steps to reproduce	<div><div>1. Click on the field and then out of it to lose focus and show required validation message:</div><div><p>What is your name? *</p><div></div><p>This field is required.</p></div><div>2. Click on the field again and start typing and quickly click on another field while you continue typing. This will cause the form to lose focus on the first field and the error message will appear:</div><div><div><h3>This is a Liferay Forms</h3><p>This is a description field from our Liferay Forms</p><p>This is the first page of our forms. Let's party rock.</p><p>What is your name? *</p><div>qqqqqq</div><p>This field is required.</p><p>Why did you join the testing area? *</p><div>qqqqqq</div></div></div><p>P.S. This error occurs in all fields of the form</p></div>
